DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kivimaa (US 3,213,909).

Kivimaa discloses all the steps of the invention including:

- a) continuously feeding the stock from an upstream input position to a downstream output position (col. 2, line 66);
- b) simultaneously sawing the stock into a plurality of thinner pieces of stock as the stock is fed relative to a plurality of parallel blades by driving the blades in a reciprocating motion comprising alternate cutting and non-cutting strokes (7);
- c) moving the reciprocating blades alternately upstream and downstream into linearly-offset cutting and non-cutting positions relative to the stock (col. 2, line 33);
- d) coordinating the reciprocating movement of the blades and the linear offset motion of the blades to thereby permit continuous movement of the stock while the blades are in both the cutting and non-cutting positions and strokes (col. 2, lines 61-66);

e) the depth of cut of a single cutting stroke of the blades is equal to the sum of the downstream travel of the feed stock during the cutting stroke and the linear upstream travel of the blades from the non-cutting to the cutting position (depth of cut is equal to the sum of the downstream travel of 17 during the cutting stroke and the linear upstream of travel of the blades from a little backward position at a lower dead center of the non-cutting to the cutting position).

Allowable Subject Matter

3. Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. DE 3828431 and WO 96/35559 are cited to show related devices.
